

# INFOGRAPHY AND CLIMATOLOGY

IN  
• COSTA DEL SOL •

The **Costa del Sol** is known everywhere for its monuments, typical cuisine, traditions, beaches, and an amount of features that make it irresistible for any kind of tourists. All these virtues are strengthened by the **best weather in Europe**.

The area has a **Mediterranean climate**, with mild temperatures for the whole year. So much so that you can visit any part of the province wearing a T-shirt in the middle of November!

The Costa del Sol benefits from **365 sunny days a year**, and the short rains that pour usually do in the months of November and May.

The province of Málaga enjoys the **warmest winter in Europe**. The average daytime temperature in the period between from December to February is 18°C. then is when the mountains near Málaga block the cold Northerly winds. As an average, summer season lasts around eight months, from April to November, although temperatures often reach 20°C. in the other four ones left.
